

- ✓ **Class II Insulation** Distribution Boards with **aluminum frame and door** for **16 up to 168** DIN rail modules capacity.
- ✓ Enclosures with **90mm, 125mm and 200mm depths**.
- ✓ Available for **Surface (SM) and Flush Mounted (FM)** applications.
- ✓ **IP54** and **IK07**.
- ✓ The **Surface Mounted (SM)** enclosures with 750mm, 875mm and 1000mm height are manufactured with a **metal cover - Mechanical Reinforcement** - which increases its resistance and stability and assures an **IK09**.

Easy and Effective

Use the plastic label holder (codes 0023008; 0023012; 0023014), and the circuit marking labels available at quiterios.com.

1 Accessibility and Safety

Easy access to **insulated busbars** supplied with the enclosures.

2 Mechanical Reinforcement

Surface Mounted (SM) enclosures with **750, 875 and 1000mm height** manufactured with a **metal cover - Mechanical Reinforcement**, increasing its protection degree - **IK09**. Suitable for **industrial application**.

3 Reinforcement Kit

Metallic Reinforcement Kit (code 0022012 - 0022054) for **Surface Mounted (SM)** enclosures with **125mm depth; 375mm and 500mm height**, which ensures a degree of protection **IK09**.

4 Flexibility

Removable chassis, allowing the electrification outside the enclosure.

5 High Resistance and Aesthetics

White lacquered **aluminum frame and door**. **Flat lock**.

6 Functionality

Modular panels

7 Easy to Assemble

Accessories that allow perfect **horizontal or vertical assembly** between **FLush Mounted (FM)** or **Surface Mounted (SM)** enclosures. Assemble the **SAFETYMAX® Distribution Board** with the **VDI_RACK®** and get a perfect final solution.

Accessories

All the **SAFETYMAX®** solutions are supplied with **insulated busbars; circuit marking labels; blanking plate to cover the empty modules**.
