

Motor contactor CEM

Application

Contactors are used to remotely control and protect (in combination with overload relays) electric motors and other electric loads with nominal power up to 160kW (at 400V AC3 duty).

Advantages

- Mounting on DIN rail and mounting plates
- High technical performance
- Low power loss (current heat loss)
- Protection against direct contact from front (IEC 536) IP20
- Wide range of accessories
- Surge suppressor (as option)
- Control voltage 24VAC, 48VAC, 110VAC, 230VAC, 400VAC

Ordering:

CEM9.01-230V-50/60Hz

I(AC3)[A]

Coil voltage

Nr. of NO Nr. of NC - Number and type of auxiliary contacts

Advantages

→ The possibility of replacing the coil to other rated voltage. (AC coil compatible only with AC contactor. DC coil compatible only with DC contactor)

→ Surge suppressors can be mounted as close as possible to source (coil).

→ Lateral (side mounting) of auxiliary contacts.

→ Front mounted auxiliary contacts

→ Mechanical interlock can lock two different size contactors

→ Special designed terminals provide reliable contact with cables.

→ Up to CEM105 possible to mount on DIN rail TH35 or directly on panel.

→ Overload relay (bimetal) can be mounted directly on contactor or on DIN rail TH35 by using an adapter
