

SCULE ASCHIETOARE SI ACCESORII

Scule pentru prelucrarea metalelor

Scule pentru gaurire, filetare, frezare, decupare / carotare si alezare

Utilizare in oteluri nealiate, slab sau inalt aliate, oteluri inoxidabile si refractare, fonte, materiale neferoase si aliajele acestora, materialele compozite, materiale plastice etc., bare, placi, profile sau diverse piese din aceste materiale

Scule pentru materiale de constructii

Scule pentru gaurire, decupare / carotare si/sau spargere

Utilizare beton, beton armat, zidarie, tencuieli, caramida plina, caramida si prefabricate celulare, placi ceramice, marmura, granit si alte tipuri de piatra (roca) naturala, asfalt, sticla, ghiata, materiale plastice, materiale stratificate diverse etc.

Scule pentru prelucrarea lemnului si a materialelor aglomerate sau stratificate

Scule pentru gaurire, frezare, decupare / carotare

Utilizare in placi din lemn sau lemn masiv, de esenta moale / esenta tare, lemn exotic, lemn verde, placi aglomerate, placi melaminate sau cu diverse alte acoperiri, placi stratificate, placi sau lemn cu cuie, etc.

113Y

Burghie SDS-plus pentru beton cu armatura

Caracteristici

- pastila Monobloc din CMS cu punct de autocentrare
- unghi la varf 135°.
- 3 muchii taietoare (cea mai buna solutie).
- canale evacuare segmentate (forma patrata).
- compatibil SDS-plus.

Avantaje

- 3 muchii taietoare monobloc reprezinta cea mai buna solutie ptr gaurire a oricarui tip de beton
- varful cu autocentrare garanteaza precizie mai mare.
- geometria varfului garanteaza concentricitatea gaurii.
- canalele de evacuare segmentate accelereaza extragerea prafului si maresta durata de viata a burghiului.
