

PURE SINE WAVE INVERTER VOLT POLSKA

SinusPRO 900 E PLUS 12/230V (600/900W)

INDEKS: 3SPM09012M

EAN: 5904100452163

The **sinusPRO 900 E PLUS 12V** is an uninterruptible power supply device for electrical heating installations (pumps, controllers, feeders etc.), computers, servers, computer sets, automatic gates, power tools.

In case of lack of mains voltage 230VAC, the inverter switches to battery power mode and allows all devices to operate uninterrupted.

The main functions included in the inverter:

- Pure sine wave DC/AC converter
- Fast switching UPS
- Mains battery charger
- AVR - Automatic Voltage Regulation

The inverter generates a **pure sine wave** at the output, which makes it possible to work with practically any type of load, especially induction devices like power tools, air compressors, air conditioners, refrigerators, freezers.

The **sinusPRO 900 E PLUS 12V** inverter is designed to cooperate with maintenance-free AGM, LiFePO4 and gel batteries.

Main features:

MODEL	sinusPRO 900 E PLUS 12V
Max power	900VA
Max current power	600W
Input voltage	170-270VAC
Output voltage	230VAC $\pm$ 1% battery mode: 216-245VAC mains mode (AVR)
Battery voltage	12VDC
Max charging current	15A
Frequency	50/60Hz $\pm$ -1Hz
Waveform	Pure sine wave
Protection	Overload, against overcharging and discharging
Working temperature	0-40°C
Dimensions/Weight	311x232x140mm/6kg
Gross Dimensions/Weight	400x330x205mm/7kg
Multipack Dimensions/Weight	415x345x225mm/7kg
