

SCULE IZOLATE LA 1000 V

Protectia totala

Sculele izolate VDE Unior asigura protectia totala, chiar si la utilizarea in apropierea sau in contact cu circuitele sub tensiune cu un potential mergand pana la 1000 Volți. Sculele sunt controlate prin teste de rezistenta la impact, la electricitate, la foc, de adeziune a izolatiei si de rezistenta la strapungere, fiecare scula fiind controlata individual.

Otel de inalta calitate

Cheile noastre, clestii, foarfecii, surubelnitele si alte scule izolate concepute pentru lucrul la instalatii electrice sau care folosesc alta forma de energie sunt fabricate din oteluri de inalta calitate, cu protectie sporita si sunt concepute pentru o utilizare simpla si sigura.

Reglementarile VDE

Izolate si controlate conform reglementarilor VDE, sculele Unior destinate lucrarilor sub tensiune satisfac exigentele normelor europene EN60900, recunoscute international

Caracteristicile surubelnitelor Unior

MANER ERGONOMIC

Combinatia de suprafete dure si moi imbunatateste factorul de incarcare si asigura insurubarea usoara. Manerul a fost conceput in asa fel incat are grija de sanatatea utilizatorului pentru ca reduce tensiunea in muschii mainii

Suprafata maxima de contact a mainii = valoare de cuplu superioara

Conceptia ergonomica a manerului = protejarea mainii
