## ICE TOUCH KNX - BLACK

| Code | Description | For support <br> codes | Pack <br> Carton |
| :--- | :--- | :--- | :--- |
| CW 16 962 CN | 2 symbols | GW16803 | 1 |
| CW 16 964 CN | 4 symbols | GW16803 | 1 |
| CW 16 966 CN | 6 symbols | GW16803 | 1 |

CHARACTERISTICS: plates in glass and with a glossy finish, used to complete the touch push-button panel modules - KNX (CW10746) or Easy (CW10741).

CONTACT INTERFACES

CW 90721 A

KNX 2-AND 4-CHANNEL CONTACTS INTERFACES

| Code | No. input <br> channels | No. output <br> channels | Max <br> cable length | Dimensions <br> $\mathbf{L x H x D}(\mathbf{m m})$ | Pack <br> Carton |
| :--- | :--- | :--- | :--- | :--- | ---: |
| CW 90 727 | 2 | 2 | 10 m | $38 \times 32 \times 14$ | 1 |
| GW 90 721 A | 4 | 4 | 10 m | $38 \times 32 \times 14$ | 1 |

CHARACTERISTICS: BUS interfaces for connecting 2 or 4 push-buttons or conventional potential-free contacts. The reading voltage (SELV) is generated inside the device. For each input, an output is available for powering a low absorption LED (lower than 1mA such as, for example, CW10886, CW10887, CW10888, CW10889, CW10890) for displaying the status of the load commanded. To be configured with ETS software.
APPLICATIONS: for sending ON-OFF commands with fronts management, switching commands and sequences, brief / prolonged contact closure management, timed commands, priority commands, commands for managing roller shutters (single or double push-button), dimmers (single or double push-button), scenes (storage and activation), impulse count, output LED control, acquisition of temperature values via NTC sensor (CW90721A only). Installation in flush-mounting box, junction boxes or embedded in the blanking modules CW10571, CW12571, CW14571. The slot on the plastic casing also allows it to be fixed with screws.
NOTES: equipped with coupling terminal for connection to the BUS, and unshielded cables for connecting the inputs, of length 30 cm extendible to 10 m with unshielded twisted cable.

KNX 8-CHANNEL (4 DIGITAL + 4 UNIVERSAL) INPUT MODULE - IP2O - DIN RAIL MOUNTING

| Code | No. input <br> channels | No. universal <br> input channels | No. output <br> channels | No. DIN <br> modules | Pack <br> Carton |
| :--- | :--- | :--- | :--- | :--- | :--- |
| CW 90 728 | 4 | 4 | 4 | 4 | 1 |

CHARACTERISTICS: the module has 4 digital inputs for push-buttons or conventional potential-free contacts and 4 universal input channels. The universal input channels can be configured as inputs for push-buttons or conventional potential-free contacts, analogue inputs ( $0 . .20 \mathrm{~mA}, 4.20 \mathrm{~mA}, 0.10 \mathrm{~V}, 0.1 \mathrm{~V}$ ), digital inputs for measurement devices with SO interface, inputs for NTC probe sensors that can be used for controlling the same number of thermoregulation areas. The module is provided also with 4 PWM outputs for LEDs ( 3.3 V ) for signalling the status of the loads. The device has 8 amber LEDS for signalling the status of the inputs. To be configured with ETS software.
APPLICATIONS: the input channels are used for sending ON-OFF commands with fronts management, switching commands and sequences, brief / prolonged contact closure management, timed commands, priority commands, thermoregulation commands, commands for managing roller shutters (single or double push-button), dimmers (single or double push-button), scenes (storage and activation), impulse count.
NOTES: equipped with coupling terminal for connection to BUS (with protection lid).
